Announcing our TransHealth program

This year, there have already been over 500 anti-trans laws proposed in the United States.

TransHealth remains focused on amplifying the voices of individuals who have experienced barriers to healthcare due to anti-trans legislation.

If you or a loved one has faced added uncertainty or encountered new barriers to receiving medical care due to anti-trans legislation or government overreach, we are eager to listen to your experiences.

Join us in our efforts to educate both individuals and organizations about the adverse health impact of anti-trans legislation.

We invite anyone to share their story with us!

Email transhealth@cancer-network.org to get involved!
